- a: hopeful b: careful c: useful

2 Q: Read the passage then answer the questions. (2 points)

The sun, at the center of Solar System and the planets around it are among the wonders of creation.

Venus is the second planet from the sun which is sometimes called Earth's twin. This is because their sizes and weights are alike. You can see it without telescope and it is the second brightest object in the night sky after the moon. Venus and Earth are also different. It doesn't have life and water like Earth . It has no moon . It is a dry, hot planet. The Romans named it Venus for their goddess of love and beauty.

٢٥

True or False

52 – Venus doesn't have any moons.

Choose the correct answer

53-we can't live on Venus because.....

a: it doesn't have water
